

**Transportation for
Early Intervention/Early Childhood Special Education**

Jefferson County School District 509-J will provide transportation services for children identified as having special needs in order for those children to access special education services when transportation services from Warm Springs Early Childhood Education program are not available or appropriate and parents are not able to provide transportation for their children.

Whenever possible, children with disabilities must be transported in the same vehicles used to transport other children enrolled in the Warm Springs Early Childhood Education program.
